

# PAPER BALL GAME

## CHALLENGE

Make throwing fun! Build your very own electronic game. Players will try to land a wastepaper into a cup or container

## WHAT WILL HAPPEN?

The light sensor is to be embedded into the base of the cup or container. Each time a paper ball lands inside, the sensor will be covered and the LED grid will display a score increment. The first to reach 5 points wins. The buzzer is used to provide additional indication each time someone scores.
